PLUS

A safe and comfortable non-surgical solution that results in a younger looking appearance.

REFINE YOUR BODY

“I had some annoying and ugly sagging skin just above my knees. I work out a lot and just had no other way to get the skin back to where I needed it to go, the Plus got me back in summer shorts again.”

- KAYLA | PATIENT

WHAT IS PLUS?

Plus uses thermal technology to effectively treat and improve the appearance of the dermis. Plus technology with built-in temperature controls allow the device to reach clinically-proven optimal temperatures for effective treatments on the abdomen, upper and lower body. After Plus treatments you can achieve a more youthful profile on targeted areas.

IS PLUS FOR ME?

Plus is recommended for individuals who are looking for a non-invasive skin treatment to address larger areas of the body to improve skin appearance. Plus can be used to remodel body tissue to provide a more youthful appearance. Plus is safe and can be used on all skin types and tones.

WHAT RESULTS WILL I SEE AND FEEL?

During treatment most patients will feel a heat sensation. Over time, patients will begin to notice a more youthful looking appearance.

HOW DOES PLUS WORK?

Plus was created and based on the development and clinical success of the proprietary A.C.E. (Acquire, Control and Extend) technology. A.C.E. technology targets deep within the skin to ensure that no areas are under, or over-treated, thereby maximizing results and providing consistent outcomes.

PLUS USES PROPRIETARY A.C.E. (ACQUIRE, CONTROL, EXTEND) TECHNOLOGY WHICH PROVIDES SAFE, COMFORTABLE AND EFFECTIVE TREATMENTS AT OPTIMAL ENERGY SETTINGS TO MAXIMIZE AESTHETIC OUTCOMES.

WHAT AREAS CAN BE TREATED?

Plus can be used on parts of the body that may need remodeling after the effects of weight gain/loss or general aging. Most common areas of treatment include the abdomen, arms (bat wings), inner thighs, outer thighs, back fat and knees.

WILL IT HURT?

Plus is essentially painless and has no downtime; it feels like a hot stone massage. Patients may see slight redness in the treated area, which will lessen within a few hours. All patients are able to return to their daily activities immediately after treatment.

HOW MANY SESSIONS ARE RECOMMENDED?

Typically, weekly sessions are recommended over a six to eight week period. Scheduling should be based on a pre-evaluation. Best results will be noticed over time or after a series of treatments.

Please speak to your aesthetic provider to see if you are a candidate.
